

SOFTWARE ENGINEER

ULOR PASCAL

PERSONAL PROFILE

I am a backend focused Full-Stack Software Engineer with over 7 years hands on engineering experience and a BSc. in mathematics. I have vast experience in the FinTech space where I've built payment solutions and designed microservices.

AREAS OF EXPERTISE

- Experienced in NodeJS (JavaScript/Typescript, NestJS), Python, Golang and PHP
- Hands-on experience with Databases (SQLite, MongoDB, PostgreSQL, MySQL) and use of SQL, ORM and query-builders (Knex, Sequelize)
- Proficient in frontend technologies like React, Redux, HTML and CSS
- Proficient with testing using Mocha, Chai, Jest, Supertest
- Proficient with CI/CD and cloud infrastructure management using Travis, Github actions, Heroku, AWS, Docker, Firebase
- Proficient at application monitoring using ELK, NewRelic, Datadog and POSTMAN

OTHER SKILLS

- The ability to analyse and communicate complex technical information or data
- Ability to Collaborate effectively
- Product Management
- Think through problems holistically and proffer solutions.
- Proficient with version control systems (Git)
- Proficient at project management and documentation using JIRA, Confluence, Pivotal Tracker
- Excellent at Designing Systems and APIs (REST API, GraphQL, NodeJS, Express, Laravel)
- Sound knowledge of Agile methodology
- Good understanding of data structure, algorithms and design principles (SOLID)

CERTIFICATIONS

- AWS Certified Cloud Practitioner

EDUCATION HISTORY

UNIVERSITY OF IBADAN

Bachelor of Science in Mathematics (Honors)
October 2009 – April 2014
• Member Tedder Hall Press, Librarian
Department of Mathematics

WORK EXPERIENCE

HEAD OF ENGINEERING

[Grey Invent | Fulltime | April 2026 – Present](#)

- Lead and manage the engineering team to ensure high performance and accountability.
- Define and execute the company's technical strategy in alignment with business goals.
- Oversee system architecture, scalability, and reliability across all products.
- Collaborate cross-functionally with product, design, and business teams.
- Establish engineering standards, processes, and best practices.
- Recruit, mentor, and develop engineering talent.
- Ensure code quality, system performance, and timely delivery of projects.

SENIOR SOFTWARE ENGINEER (BACKEND)

[Grey Invent | Fulltime | May 2025 – March 2026](#)

- Design, develop, and maintain scalable backend services and APIs.
- Optimize database structures, queries, and server performance.
- Implement security best practices, authentication, and data protection.
- Write clean, maintainable code and enforce coding standards through reviews.
- Build and maintain CI/CD pipelines for efficient deployments.
- Identify, troubleshoot, and resolve backend issues and system failures.
- Collaborate with frontend engineers, product managers, and other stakeholders.

FOUNDING SOFTWARE ENGINEER

[Apac Inc. | Fulltime, USA | Feb 2024 – May 2025](#)

- Oversee system design and development. Shipped maintainable code to keep the system functional.
- Authored solution design RFCs for customer referrals in line with product requirements.
- Liaise with business executive team on product enhancement and marketing strategies.
- Designed and implemented customer referral system on the platform to track the reach of sales representatives.

SENIOR SOFTWARE ENGINEER

[Payrix | Contract, USA | April 2022 – Aug 2023](#)

- Setup APIs and microservices to manage risks, user authentication and onboarding.
- Setup automated QA workflow, API documentations and solution design RFCs based on product requirements.
- Integrate with third-party APIs and services to facilitate payments and verification (KYC).
- Designed and implemented a fail-over solution for transactions and policies to forestall failures from third-party integrations.

CHIEF TECHNOLOGY OFFICER

[Woven Finance | Fulltime, Nigeria | Aug 2020 – April 2022](#)

- Designed and implemented a payout and direct debit service to facilitate payments.
- Integrated 3rd party APIs of various banks and financial institutions to facilitate payments queries, reconciliation and settlement.
- Setup Microservices for notification and payments, to improve the scalability and availability of the system.
- Improved code quality and efficiency by setting up unit and integration tests for CI/CD pipeline. Setup monitoring using the ELK stack.
- Setup and managed Infrastructures/deployment pipelines (AWS, terraform, Kubernetes) and Database (MYSQL)
- Coordinated and managed a team of software Engineers. Liaised with customer support to resolve user and product issues effectively.

FULLSTACK SOFTWARE ENGINEER

[Lingooowl](#) | Remote, Denmark | May 2021 – Sept 2021

- Designed a seamless onboarding process based on client/business requirement to reduce complexity and improve user experience.
- Setup quote analytics for a hybrid document translation.
- Setup AuthO login with OTP (One-Time Password) for robust and secure user authentication.

BACKEND ENGINEER

[Remote Roofing](#) | Remote, US | June 2020 – August 2020

- Design systems and services based on products/business requirements.
- Led the backend team in building an API to automate report generation and PDF download.
- Coordinated with the data science team to improve data engineering and retrieval.

FULLSTACK ENGINEER

[dotpay.io](#) | Remote, France | May 2020 – August 2020

- Conceptualized, designed and built an SMS payment platform in a team of 4 software engineers.
- Setup Apollo-client on the frontend to facilitate API integrations and Implement the SMS invoicing feature.
- Consume GraphQL onboarding API and integrate the Stripe payment API on the frontend.

TECHNICAL TEAM LEAD & MENTOR

[Lambda School](#) | Remote, US | November 2019 – April 2020

- Review student code and provided detailed feedback on areas of improvement.
- Schedule meetings with Product Managers and Stakeholders for product cycle approval.
- Mentor students on how to learn effectively and solve programming problems.
- Facilitate daily standup meetings to build camaraderie and facilitate sharing of ideas.

SOFTWARE ENGINEER

[Andela](#) | Lagos, Nigeria | April 2019 – September 2019

- Designed and developed applications ranging from voting platforms to CMS, built mostly with PERN and MERN.
- Collaborated remotely with teams based in EU and US on software projects and led demo presentations.

PROGRAMMING LEARNING FACILITATOR

[Code Lagos](#) | Lagos, Nigeria | May 2018 – Aug 2018

- Trained students from diverse backgrounds on developing and maintaining front end functionality of websites.
- Supervised student project delivery by providing feedback, debugging support and guidance.
- Built sample software applications to serve as a model for student projects.
